

**IN THE SPECIFICATION**

On Page 2, beginning at line 17, please amend the paragraph as follows:

Recently, third-generation (3G) wireless radiotelephone communication systems have been proposed in which a reverse-link (mobile station to base station) pilot channel is used. For example, in the currently proposed cdma2000 standard, the mobile station transmits a Reverse Link Pilot Channel (R-PICH) that the base station uses for initial acquisition, time tracking, rake-receiver coherent reference recovery, and power control measurements. Such a reverse link pilot is described in detail in ~~co-pending U.S. Patent Application Serial No. 08/886,604~~ U.S. Patent No. 6,396,804, entitled "HIGH DATA RATE CDMA WIRELESS COMMUNICATION SYSTEM", assigned to the assignee of the present invention and incorporated by reference herein.
